

ICCF

ICCF publishes guidance documents in French.

08th June 2021 - The International Cooperation for Convergence of Technical Requirements for the Assessment of Feed Ingredients (ICCF) Steering Committee is pleased to announce that the following guidance documents are now available in French:

- Stability Testing of feed ingredients
- Sub-chronic oral toxicity testing in laboratory animals
- Homogeneity testing of feed ingredients
- Genotoxicity testing.

These translations are provided through the support of ICCF Canadian members. The French documents can be downloaded from the [ICCF Technical Guidance Documents \(iccf.feed.org\)](http://iccf.feed.org) webpage.

About ICCF

The International Cooperation for the Convergence of Technical Requirements for the Assessment of Feed Ingredients (ICCF) was created in 2017. It was founded by the Canadian Food Inspection Agency (CFIA) and the Animal Nutrition Association of Canada (ANAC), the United States Food and Drug Administration (FDA) and the American Feed Industry Association (AFIA), the European Commission (DG SANTE)¹ and the EU Association of Specialty Feed Ingredients and their Mixtures (FEFANA), and the International Feed Industry Federation (IFIF). The ICCF aims at developing science-based technical guidance documents supporting the feed industry in assessing their products and to aid in the preparation of pre-market assessment submissions. For more information about the ICCF, please contact the ICCF secretariat at secretariat@iccf.feed.org
